WORK EXPERIENCE

SENIOR ITS CONSULTANT @ UT SERVICE DESK

January 2016 - Present

Politely responds to a customer's problems and convey a resolution either by resolving it first contact or escalating to the next level of support. Maintain and update technical service documentation and assist co-workers in related tasks.

MENTOR @ TEXAS INTERDISCIPLINARY SCHOLARS

August 2015 - May 2016

Assisted 5 computer science students on their transition from highschool to college. Met with the group weekly to make sure students are healthy and provide advice, tools, and strategies for students to further academic success

PROJECTS

SMARTFLASH

HackTX 2017 AWS, Node.js, React, MongoDB

Allows users to utilize flashcards style studying audibly through Alexa-enabled devices. The Alexa skill prompts users to choose a language and prompts them with words or phrases to translate. The performance of individual users is managed through MongoDB and is visualized on the accompanying web app written with React.

PORTFOLIO

Septemeber 2017 React HTML&CSS

Portfolio written in HTML & CSS. The website uses a beautiful layout to showcase information about me and a platform to provide contact information

BETTERREADS

August 2017 Flask, SQLAlchemy, React

An online database of books with the ability to search for author, books, series, and ratings. The website scrapes data off other APIs that provide book information. By using the information, the website utilizes its own API and provide access for others to scrape.

FIGURESBOT

March 2017 Python, Amazon, Praw, Keepa API

Filter Amazon links in Reddit threads to show produc history. Utilizes PRAW API to cycle through submissions and comments on Reddit and looks for Amazon links. The links show information about the product's price history using Amazon's API and displaying data through Keepa's API

MACRO-CALCULATOR

December 2015 Java, XML, Android Studio

Google Playstore mobile application with almost 50,000+ downloads. Designed the front end of the application with XML. In Android Studio, coded with the 'Reverse Harry Benedict' Equaiton to provide daily number of macronutrients for users.
